PROFILE

Mechanical Engineer with over 12 years of professional experience and 3+ years in software development. Specialized in Full Stack development with Angular, process automation, data analytics using Power BI and low-code platforms, and AI implementation in learning and training models.

Experienced in leading technology teams and managing multiple projects under Scrum methodologies, with a strong focus on process optimization, critical incident resolution, and scalable solution development in cloud and transactional environments.

Combines industrial engineering analytical thinking with software development expertise to improve operational efficiency, drive innovation, and deliver data-driven business solutions for technology-oriented organizations.

Technologies and tools

Programming Languages:

- Angular (Front End)
- Data bases (Oracle, SQL Server, MySQL).
- Git, GitHub, HTML, CSS, SCRUM, Looker Stud.
